

## General Description

The AOZ8211DI is a one-line transient voltage suppressor diode designed to protect voltage sensitive electronics from high transient conditions and ESD.

This device incorporates one TVS diode in an ultra-small DFN 1.0 mm x 0.6 mm package. During transient conditions, the one-line TVS diode directs the transient to ground. It may be used to meet the ESD immunity requirements of IEC 61000-4-2, Level 4 ( $\pm 15$  kV air,  $\pm 8$  kV contact discharge).

The AOZ8211DI comes in an RoHS compliant package and is rated over a  $-40$  °C to  $+85$  °C ambient temperature range.

The ultra-small 1.0 mm x 0.6 mm x 0.5 mm DFN package makes the AOZ8211DI ideal for applications where PCB space is at a premium. The small size and high ESD protection makes the AOZ8211DI ideal for protecting voltage sensitive electronics from high transient conditions and ESD.
